[For the Department of Transportation statement of organization, see the *Code of Federal Regulations*, Title 49, Part 1, Subpart A]

The U.S. Department of Transportation establishes the Nation's overall transportation policy. Under its umbrella are 11 administrations whose jurisdictions include highway planning, development, and construction; motor carrier safety; urban mass transit; railroads; aviation; and the safety of waterways, ports, highways, and oil and gas pipelines. Decisions made by the Department in conjunction with the appropriate State and local officials strongly affect other programs such as land planning, energy conservation, scarce resource utilization, and technological change.

The Department of Transportation (DOT) 1966, as amended (49 U.S.C. 102 and was established by act of October 15, 102 note), "to assure the coordinated,

DEPARTMENT OF TRANSPORTATION

effective administration of the transportation programs of the Federal Government” and to develop “national transportation policies and programs conducive to the provision of fast, safe, efficient, and convenient transportation at the lowest cost consistent therewith.” It became operational in April 1967 and was comprised of elements transferred from eight other major departments and agencies.

Secretary The Department of Transportation is administered by the Secretary of Transportation, who is the principal adviser to the President in all matters relating to Federal transportation programs.

Aviation and International Affairs The Office of the Assistant Secretary for Aviation and International Affairs has principal responsibility for the development, review, and coordination of policy for international transportation, and for development, coordination, and implementation of policy relating to economic regulation of the airline industry. The Office:

- licenses U.S. and foreign carriers to serve in international air transportation and conducts carrier fitness determinations for carriers serving the United States;

- develops policies to support the Department in aviation and maritime multilateral and bilateral negotiations with foreign governments and participates on the U.S. negotiating delegations;

- develops policies on a wide range of international transportation and trade matters;

- arranges and coordinates cooperative agreements with foreign governments for the exchange of state-of-the-art scientific and technical information;

- processes and resolves complaints concerning unfair competitive practices in domestic and international air transportation;

- establishes international and intra-Alaska mail rates;

- determines the disposition of requests for approval and immunization

from the antitrust laws of international aviation agreements; and

- administers the essential air service program.

For further information, call 202-366-8822.

Drug and Alcohol Policy and Compliance The Office ensures that the national and international drug and alcohol policies and goals of the Secretary are developed and carried out in a consistent, efficient, and effective manner within the transportation industries. The Office provides expert advice, counsel, and recommendations to the Secretary regarding drugs and alcohol as it pertains to the Department of Transportation and testing within the transportation industry.

For further information, contact the Office of Drug and Alcohol Policy and Compliance. Phone, 202-366-3784.

Intelligence and Security The Office advises the Secretary on domestic and international intelligence and security matters; coordinates the development and implementation of long-term strategic plans, information management systems, and integrated research and development programs affecting the security of the traveling public and cargo; serves as the focal point in the Department for intelligence and security policy, weapons of mass destruction, critical infrastructure protection, and drug and illegal immigrant interdiction effects on transportation systems; and provides oversight of transportation security and intelligence programs.

For further information, contact the Office of Intelligence and Security. Phone, 202-366-6525.

Transportation Policy The Office of the Assistant Secretary for Transportation Policy has principal responsibility for analysis, development, articulation, and review of policies and plans for all modes of transportation. The Office:

- develops, coordinates, and evaluates public policy related to the transportation industries, and maintains policy and economic oversight of regulatory programs and legislative initiatives of the Department;

- reviews transportation matters involving the public and private sectors, analyzes current and emerging transportation policy issues, and assesses their economic and institutional implications;

- provides departmental policy leadership and coordination on safety, energy, and environmental initiatives which affect air, surface, marine, and pipeline transportation; and

- provides leadership on questions involving the financing of transportation infrastructure projects, and provides

economic analyses of new transportation technologies; and

- coordinates the development of intermodal transportation solutions that move people and goods in an energy-efficient manner, provide the foundation for improved productivity growth, strengthen the Nation's ability to compete in the global economy, and obtain the optimum yield from the Nation's transportation resources.

For further information, contact the Office of Transportation Policy. Phone, 202-366-4416.

Federal Aviation Administration

The Federal Aviation Administration (FAA), formerly the Federal Aviation Agency, was established by the Federal Aviation Act of 1958 (72 Stat. 731). The agency became a component of the Department of Transportation in 1967 pursuant to the Department of Transportation Act (49 U.S.C. 106). The mission of the FAA is to regulate civil aviation and U.S. commercial space transportation, maintain and operate air traffic control and navigation systems for both civil and military aircrafts, and develop and administer programs relating to aviation safety and the National Airspace System.

Activities

Air Navigation Facilities The agency is responsible for the location, construction or installation, maintenance, operation, and quality assurance of Federal visual and electronic aids to air navigation. The agency operates and maintains voice/data communications equipment, radar facilities, computer systems, and visual display equipment at flight service stations, airport traffic control towers, and air route traffic control centers.

Airport Programs The agency maintains a national plan of airport requirements, administers a grant program for development of public use airports to assure and improve safety and to meet current and future airport capacity needs, evaluates the

environmental impacts of airport development, and administers an airport noise compatibility program with the goal of reducing noncompatible uses around airports. It also develops standards and technical guidance on airport planning, design, safety, and operations and provides grants to assist public agencies in airport system and master planning and airport development and improvement.

Airspace and Air Traffic Management

The safe and efficient utilization of the navigable airspace is a primary objective of the agency. To meet this objective, it operates a network of airport traffic control towers, air route traffic control centers, and flight service stations. It develops air traffic rules and regulations and allocates the use of the airspace. It also provides for the security control of air traffic to meet national defense requirements.

Civil Aviation Abroad Under the Federal Aviation Act of 1958 and the International Aviation Facilities Act (49 U.S.C. app. 1151), the agency encourages aviation safety and civil aviation abroad by exchanging aeronautical information with foreign aviation authorities; certifying foreign repair stations, airmen, and mechanics; negotiating bilateral airworthiness agreements to facilitate the import and export of aircraft and components; and providing technical assistance and

training in all areas of the agency's expertise. It provides technical representation at international conferences, including participation in the International Civil Aviation Organization and other international organizations.

Commercial Space Transportation The agency regulates and encourages the U.S. commercial space transportation industry. It licenses the private sector launching of space payloads on expendable launch vehicles and commercial space launch facilities. It also sets insurance requirements for the protection of persons and property and ensures that space transportation activities comply with U.S. domestic and foreign policy.

Registration The agency provides a system for registering aircraft and recording documents affecting title or interest in the aircraft, aircraft engines, propellers, appliances, and spare parts.

Research, Engineering, and Development The research, engineering, and development activities of the agency are directed toward providing the systems, procedures, facilities, and devices needed for a safe and efficient system of air navigation and air traffic control to meet the needs of civil aviation and the air defense system. The agency also performs an aeromedical research function to apply knowledge gained from its research program and the work of others to the safety and promotion of civil aviation and the health, safety, and efficiency of agency employees. The agency also supports development and testing of improved

aircraft, engines, propellers, and appliances.

Safety Regulation The Administration issues and enforces rules, regulations, and minimum standards relating to the manufacture, operation, and maintenance of aircraft, as well as the rating and certification (including medical) of airmen and the certification of airports serving air carriers. It performs flight inspection of air navigation facilities in the U.S. and, as required, abroad.

Test and Evaluation The agency conducts tests and evaluations of specified items such as aviation systems, subsystems, equipment, devices, materials, concepts, or procedures at any phase in the cycle of their development from conception to acceptance and implementation, as well as assigned independent testing at key decision points.

Other Programs The agency administers the aviation insurance program. It is an allotting agency under the defense materials system with respect to priorities and allocation for civil aircraft and civil aviation operations. The agency develops specifications for the preparation of aeronautical charts. It publishes current information on airways and airport service and issues technical publications for the improvement of safety in flight, airport planning and design, and other aeronautical activities. It serves as the executive administration for the operation and maintenance of the Department of Transportation automated payroll and personnel systems.

Federal Highway Administration

The Federal Highway Administration (FHWA) was established as an agency of the Department of Transportation by the Department of Transportation Act (49 U.S.C. 104). The mission of the FHWA is to promulgate and enforce highway safety regulations, administer highway transportation programs, and conduct research and development in support of improving and preserving America's highway system. The Administration also manages the Federal-aid highway program, in partnership with State and local governments, and provides grants to assist State transportation departments and metropolitan planning organizations in developing statewide and metropolitan intermodal transportation plans and programs.

Federal-aid Highway Program FHWA manages the Federal-aid highway programs and engineering policies and standards, and provides technical expertise and assistance relating to the design, construction, and maintenance of the Nation's highways, pavements, bridges, tunnels, hydraulic/geotechnical structures, and other related engineering activities.

Federal Lands Programs FHWA manages the Federal lands highway

program, the emergency relief program for federally owned roads, and the defense access roads program. It also provides transportation services, planning, design, procurement, and construction oversight to Federal agencies, serves as an advocate for safe public access to Federal and Indian lands, and develops and disseminates technology relative to transportation access to Federal and Indian lands. The Federal lands highway program is administered by three division offices.

Field Operations FHWA's field structure is comprised of a resource center operating out of five locations. The resource center provides specialized program expertise and support to the FHWA's 52 State-level division offices. The division offices provide Federal-aid highway program assistance for highway transportation and safety services, including planning and research, preliminary engineering, technology transfer, right-of-way, bridges, highway safety, traffic operations, environment, civil rights, design, construction and maintenance, engineering coordination, highway beautification, and management.

Federal Railroad Administration

The Federal Railroad Administration was created pursuant to section 3(e)(1) of the Department of Transportation Act of 1966 (49 U.S.C. 103). The purpose of the Administration is to promulgate and enforce rail safety regulations, administer railroad financial assistance programs, conduct research and development in support of improved railroad safety and national rail transportation policy, provide for the rehabilitation of Northeast Corridor rail passenger service, and consolidate government support of rail transportation activities.

Activities

Passenger and Freight Services The Administration oversees and provides financial assistance to Amtrak and administers financial assistance programs to demonstrate high-speed rail technology, to reduce grade crossing hazards in high-speed rail corridors, to provide for investments in small freight railroads and other rail projects, to plan for high-speed rail projects, and to plan and deploy magnetic levitation technology.

Railroad Safety The Administration administers and enforces the Federal laws and related regulations designed to promote safety on railroads; exercises jurisdiction over all areas of rail safety under the Rail Safety Act of 1970, such as track maintenance, inspection standards, equipment standards, and

operating practices. Railroad and related industry equipment, facilities, and records are inspected and required reports reviewed. In addition, the administration educates the public about safety at highway-rail grade crossings and the danger of trespassing on rail property.

Research and Development The Administration's ground transportation research and development program seeks to advance all aspects of intercity ground transportation and railroad safety pertaining to the physical sciences and engineering, in order to improve railroad safety and ensure that railroads continue to be a viable national transportation resource.

Transportation Test Center The Administration tests and evaluates conventional and advanced railroad systems and components at the Transportation Test Center near Pueblo, CO. Private sector companies and the Governments of the United States, Canada, and Japan use the facility to explore the operation of conventional and advanced systems under controlled conditions. It is used by Amtrak for the testing of new high-speed locomotives and trains and by the Federal Transit Administration for testing urban rapid transit vehicles.

For further information, contact the Transportation Technology Center, Pueblo, CO 81001. Phone, 719-584-0507.

National Highway Traffic Safety Administration

[For the National Highway Traffic Safety Administration statement of organization, see the *Code of Federal Regulations*, Title 49, Part 501]

The National Highway Traffic Safety Administration (NHTSA) was established by the Highway Safety Act of 1970 (23 U.S.C. 401 note) to help reduce the mounting number of deaths, injuries, and economic losses resulting from motor vehicle crashes on the Nation's highways.

The Administration carries out programs relating to the safety performance of motor vehicles and related equipment; administers the State and community highway safety program with the Federal Highway Administration, corporate average fuel economy program, and Federal odometer law; carries out the National Driver Register Program to facilitate the interstate exchange of State records on problem drivers; conducts studies and operates programs aimed at reducing economic losses in motor vehicle crashes and repairs through general motor vehicle programs; and issues theft prevention standards for passenger and nonpassenger motor vehicles.

Activities

Research and Development The Administration provides a foundation for the development of motor vehicle and highway safety program standards by researching, developing, testing, and evaluating motor vehicles, motor vehicle equipment, and advanced technologies, and collecting and analyzing crash data.

The research program covers numerous areas affecting safety problems and includes providing laboratory testing facilities to obtain necessary basic data. The objectives are to encourage industry to adopt advanced motor vehicle safety designs, stimulate public awareness of safety potentials, and provide a base for vehicle safety information.

National Center for Statistics and Analysis The Administration maintains a collection of scientific and technical information related to motor vehicle safety, and operates the National Center for Statistics and Analysis, whose activities include the development and maintenance of highway crash data collection systems and related analysis efforts. These comprehensive motor vehicle safety information resources serve as documentary reference points for Federal, State, and local agencies, as well as industry, universities, and the public.

Enforcement The Office of Enforcement identifies and investigates problems with motor vehicles and motor vehicle equipment. If the Office determines that the vehicle or item of equipment contains a defect which is safety related or that it does not meet all applicable Federal motor vehicle safety standards, the Office will seek a recall in which owners are notified and the vehicles or equipment are remedied free of charge. The Office monitors recalls to ensure that owners are being notified, that the notifications are done in a timely manner, and that the scope of the

recall and the remedy are adequate to correct the problem.

The Office operates the toll-free auto safety hotline to identify safety problems in motor vehicles and motor vehicle equipment. Consumers can call the hotline (phone, 888-327-4236; TDD, 800-424-9153, or 202-366-7800 in the Washington, DC, area) 24 hours a day, 7 days a week, to report safety-related problems. English- and Spanish-speaking representatives are available between 8 a.m. and 10 p.m. eastern standard time, Monday through Friday, except Federal holidays. Consumers can also reach the hotline via the Internet at www.nhtsa.dot.gov/hotline. These calls form the basis for investigations and, ultimately, recalls if safety-related defects are identified. The hotline also provides information and literature to consumers about vehicle and child-seat recalls, New Car Assessment Program test results, and a variety of other highway safety information.

Rulemaking The Administration manages motor vehicle safety programs to reduce the occurrence of highway crashes and the severity of resulting injuries; reduce the economic losses in crashes; and provide consumer information in the areas of crash test results, rollover resistance, proper usage of vehicle safety features, and tire grading for treadwear, temperature resistance, and traction.

The Administration issues Federal motor vehicle safety standards that prescribe safety features and levels of safety-related performance for vehicles and items of motor vehicle equipment. It conducts the New Car Assessment Program, under which high-speed crash tests are conducted on passenger cars, light trucks, and vans to assess their frontal and side impact safety performance; separate tests are conducted to assess the vehicles' resistance to rollovers. Results from these tests are provided to the public to assist them in selecting and purchasing safer motor vehicles. The Administration also informs consumers on how to properly use vehicle safety features. It manages a fuel economy program that establishes

and revises fleet average fuel economy standards for passenger car and light truck manufacturers to ensure that maximum feasible fuel economy is attained. The Administration also carries out a theft program, issuing rules requiring the designation of likely high-theft vehicles that must comply with parts-marking requirements, and calculating and publishing annual motor vehicle theft rates.

Regional Operations and Program

Delivery The Administration administers State highway safety grant programs, authorized by the Safe, Accountant, Flexible, Efficient Transportation Equity Act: A Legacy for Users. The Highway Safety formula grant program provides funds to the States, Indian nations, and the territories each year to support safety programs, particularly in the following national priority program areas: occupant protection, impaired driving, police traffic services, emergency medical services, data/traffic records, motorcycle safety, pedestrian and bicycle safety, speed control, and roadway safety. Incentive grant programs are also used to encourage States to implement effective impaired driving, occupant protection, and data improvement programs.

Traffic Safety Program The Administration leads the national traffic safety and emergency services efforts in order to save lives, reduce injuries, and lessen medical and other costs. In accomplishing these tasks, it utilizes behavioral research, demonstration, and evaluation, in addition to developing safety programs and strategies, for use by a variety of public and private agencies and organizations. The Administration maintains a national register of information on individuals whose licenses to operate a motor vehicle have been revoked, suspended, canceled, or denied; or who have been convicted of certain traffic-related violations such as driving while impaired by alcohol or other drugs. The information obtained from the register assists State driver licensing officials in determining whether or not to issue a license.

Federal Transit Administration

[For the Federal Transit Administration statement of organization, see the *Code of Federal Regulations*, Title 49, Part 601]

The Federal Transit Administration (FTA) (formerly the Urban Mass Transportation Administration) was established as an operating administration of the Department of Transportation by section 1 of Reorganization Plan No. 2 of 1968 (5 U.S.C. app. 1), effective July 1, 1968. The FTA's mission is to assist in developing improved mass transportation, encourage the planning and establishment of areawide mass transportation systems, and provide financial assistance to State and local governments to finance mass transportation systems and carry out national transit goals and policy.

Programs

Capital Investment Grants are authorized to assist in financing the acquisition, construction, reconstruction, and improvement of facilities and equipment for use in mass transportation service in urban areas. There are three categories of funds available under the capital investment program: fixed guideway modernization, rolling stock renewal, safety-related improvements, and signal and power modernization; new starts funds for construction of new fixed guideway service; and bus funds for acquiring buses and rolling stock,

ancillary equipment, and the construction of bus facilities.

For further information, call 202-366-2053.

Elderly and Persons With Disabilities

The program provides financial assistance to private nonprofit agencies to meet the transportation needs of elderly persons and persons with disabilities where services provided by public operators are unavailable, insufficient, or inappropriate; to public bodies approved by the State to coordinate services for elderly persons or persons with disabilities; or to public bodies which certify to the Governor that no nonprofit corporation or association is readily available in an area to provide the service. Funds are allocated by formula to the States. Local organizations apply for funding through a designated State agency.

For further information, call 202-366-2053.

Job Access and Reverse Commute

Grants The program makes funding available to public agencies and nonprofit organizations to pay the capital and operating costs of delivering new or expanded job access or reverse commute services, and to promote the use of transit during non-traditional work hours, as well as encourage employer-based transportation strategies and use of transit pass programs. The program

provides competitive grants for two kinds of projects:

- job access projects implementing new or expanded transportation services for transporting welfare recipients and low-income persons to and from jobs and needed employment support services such as child care; and
- reverse commute projects implementing new or expanded general-purpose public transportation services to transport residents of urban, rural, and suburban areas to suburban employment centers.

For further information, call 202-366-0176. Internet, www.fta.dot.gov/wtw.

Non-Urbanized Area Assistance The Administration provides capital and operating assistance for public transportation in non-urbanized areas. Funds are allocated to the Governor, and the program is administered at the State level by the designated transportation agency. Assistance is provided for planning, administrative, and program development activities; coordination of public transportation programs; vehicle acquisition; and other capital investments in support of transit services tailored to the needs of elderly individuals and individuals with disabilities and other individuals who depend upon transit for their basic mobility.

Planning The program provides financial assistance in meeting the transportation planning needs of metropolitan planning organizations by allocating funds to States which, in turn, they allocate to the metropolitan planning organizations. Assistance is available for transportation planning, technical assistance studies, demonstrations, management training, and cooperative research.

For further information, call 202-366-1626.

Research and Technology The Administration seeks to improve public transportation for America's communities by delivering products and services that are valued by its customers and by assisting transit agencies in better meeting the needs of their customers. To

accomplish these goals, it partners with the transportation industry to undertake research, development, and education that will improve the quality, reliability, and cost-effectiveness of transit in America and that leads to increases in transit ridership.

Transit research and technology efforts are categorized as follows:

Joint Partnership The Administration enters into agreements with both public and private research organizations, transit providers, and industry to promote the early deployment of innovation in public transportation services, management, operational practices, and technology of broad applicability.

Advanced Technologies The Administration assists the study, design, and demonstration of fixed-guideway technologies, bus and bus rapid transit technologies, fuel-cell-powered transit buses, advanced propulsion control for rail transit, and other types of technologies in development.

International Mass Transportation Program The Administration promotes American transit products and services overseas, and cooperates with foreign public sector entities on research and development in the public transportation industries. Trade missions and other international gatherings enable American vendors to showcase their products and services and facilitate technology transfer and information diffusion for developing nations.

For further information, call 202-366-4052. Internet, www.fta.dot.gov/research.

Rural Transportation Assistance The Rural Transportation Assistance Program allocates funds annually to the States to provide assistance for transit research, technical assistance, training, and related support activities for transit providers serving non-urbanized areas. Additional funds are used at the national level for developing training materials, developing and maintaining a national clearinghouse on rural transit activities and information, and providing technical assistance through peer practitioners to

promote exemplary techniques and practices.

For further information, call 202-366-2053.

Safety The Administration's safety program supports State and local agencies in fulfilling their responsibility for the safety and security of urban mass transportation facilities and services, through the encouragement and sponsorship of safety and security planning, training, information collection and analysis, drug control programs, system/safety assurance reviews, generic research, and other cooperative government/industry activities.

For further information, call 202-366-2896.

Training and Technical Assistance

Through the National Transit Institute (NTI), the Administration develops and offers training courses for improving transit planning, operations, workforce performance, and productivity. NTI courses are conducted at sites across the United States on a wide variety of subjects, ranging from multimodal planning to management development, third-party contracting, safety, and security. Current NTI course offerings are available online at www.ntionline.com.

For further information, call 202-366-5741.

Maritime Administration

The Maritime Administration was established by Reorganization Plan No. 21 of 1950 (5 U.S.C. app.). The Maritime Act of 1981 (46 U.S.C. 1601) transferred the Maritime Administration to the Department of Transportation. The Administration manages programs to aid in the development, promotion, and operation of the U.S. merchant marine. It is also charged with organizing and

directing emergency merchant ship operations.

The Maritime Administration administers subsidy programs to pay the difference between certain costs of operating ships under the U.S. flag and foreign competitive flags on essential services, and the difference between the costs of constructing ships in U.S. and foreign shipyards. It provides financing guarantees for the construction,

reconstruction, and reconditioning of ships; and enters into capital construction fund agreements that grant tax deferrals on moneys to be used for the acquisition, construction, or reconstruction of ships.

The Administration constructs or supervises the construction of merchant-type ships for the Federal Government. It helps industry generate increased business for U.S. ships and conducts programs to develop ports, facilities, and intermodal transport, and to promote domestic shipping.

It conducts program and technical studies and administers a war risk insurance program that insures operators and seamen against losses caused by hostile action if domestic commercial insurance is not available.

Under emergency conditions the Maritime Administration charts Government-owned ships to U.S. operators, requisitions or procures ships owned by U.S. citizens, and allocates them to meet defense needs.

It maintains a national defense reserve fleet of Government-owned ships that it operates through ship managers and general agents when required in national defense interests. An element of this activity is the Ready Reserve force consisting of a number of ships available for quick-response activation.

The Administration regulates sales to aliens and transfers to foreign registry of ships that are fully or partially owned by U.S. citizens. It also disposes of Government-owned ships found nonessential for national defense.

The Administration operates the U.S. Merchant Marine Academy, Kings Point, NY, where young people are trained to become merchant marine officers, and conducts training in shipboard firefighting at Earle, NJ, and Toledo, OH. It also administers a Federal assistance program for the maritime academies operated by California, Maine, Massachusetts, Michigan, New York, and Texas.

Saint Lawrence Seaway Development Corporation

The Saint Lawrence Seaway Development Corporation was established by the Saint Lawrence Seaway Act of May 13, 1954 (33 U.S.C. 981-990) and became an operating administration of the Department of Transportation in 1966.

The Corporation, working cooperatively with the Saint Lawrence Seaway Management Corporation (SLSMC) of Canada, is dedicated to operating and maintaining a safe,

reliable, and efficient deep draft waterway between the Great Lakes and the Atlantic Ocean. It ensures the safe transit of commercial and noncommercial vessels through the two U.S. locks and the navigation channels of the Saint Lawrence Seaway System. The Corporation works jointly with SLSMC on all matters related to rules and regulations, overall operations, vessel inspections, traffic control,

navigation aids, safety, operating dates, and trade development programs.

The Great Lakes/Saint Lawrence Seaway System extends from the Atlantic Ocean to the Lake Superior ports of Duluth/Superior, a distance of 2,342 miles. The Corporation's main customers are vessel owners and operators, Midwest States and Canadian provinces,

Great Lakes port communities, shippers and receivers of domestic and international cargo, and the Lakes/Seaway maritime and related services industries. International and domestic commerce through the Seaway contributes to the economic prosperity of the entire Great Lakes region.

For further information, contact the Director of Trade Development and Public Affairs, Saint Lawrence Seaway Development Corporation, Department of Transportation, 1200 New Jersey Avenue, SE, Washington, DC 20590. Phone, 202-366-0091. Fax, 202-366-7147. Internet, www.greatlakes-seaway.com.

Pipeline and Hazardous Materials Safety Administration

The Pipeline and Hazardous Materials Administration was established on February 20, 2005. It is responsible for hazardous materials transportation and pipeline safety.

Hazardous Materials The Office of Hazardous Materials Safety develops and issues regulations for the safe and secure transportation of hazardous materials by all modes, excluding bulk transportation by water. The regulations cover shipper and carrier operations, packaging and container specifications, and hazardous materials definitions. The Office provides training and outreach to help shippers and carriers meet the requirements of the

hazardous material regulations. The Office is also responsible for the enforcement of regulations other than those applicable to a single mode of transportation. The Office manages a fee-funded grant program to assist States in planning for hazardous materials emergencies and to assist States and Indian tribes with training for hazardous materials emergencies. Additionally, the Office maintains a national safety program to safeguard food and certain other products from contamination during motor or rail transportation.

For further information, call 202-366-0656. Internet, hazmat.dot.gov.

Pipelines The Office of Pipeline Safety's (OPS) mission is to ensure the safety, security, and environmental protection of the Nation's pipeline transportation system. The Office establishes and enforces safety and environmental standards for

transportation of gas and hazardous liquids by pipeline. OPS also analyzes data, conducts education and training, promotes damage prevention, and conducts research and development for pipeline safety. Through OPS-administered grants-in-aid, States that

voluntarily assume regulatory jurisdiction of pipelines can receive funding for up to 50 percent of the costs for their intrastate pipeline safety programs. OPS engineers inspect most interstate pipelines and other facilities not covered

by the State programs. The Office also implements the Oil Pollution Act of 1990 by providing approval for and testing of oil pipeline spill response plans.

Research and Innovative Technology Administration

The Research and Innovative Technology Administration (RITA) was created under the Norman Y. Mineta Research and Special Programs Improvement Act (49 U.S.C. 101 note). RITA coordinates, facilitates, and reviews the Department's research and development programs and activities; performs comprehensive transportation statistics research, analysis, and reporting; and promotes the use of innovative technologies to improve our Nation's transportation

system. RITA brings together important DOT data, research, and technology transfer assets and provides strategic direction and oversight of DOT's Intelligent Transportation Systems Program.

RITA is composed of the staff from the Office of Research, Development, and Technology, the Volpe National Transportation Systems Center, the Transportation Safety Institute, and the Bureau of Transportation Statistics.

For further information, contact the Research and Innovative Technology Administration, Department of Transportation, 1200 New Jersey Avenue, SE., Washington, DC 20590. Phone, 202-366-7582. Internet, www.rita.dot.gov. E-mail, info.rita@dot.gov.

Federal Motor Carrier Safety Administration

The Federal Motor Carrier Safety Administration was established within the Department of Transportation on January 1, 2000, pursuant to the Motor Carrier Safety Improvement Act of 1999 (49 U.S.C. 113).

Formerly a part of the Federal Highway Administration, the Federal Motor Carrier Safety Administration's

primary mission is to prevent commercial motor vehicle-related fatalities and injuries. Activities of the Administration contribute to ensuring safety in motor carrier operations through strong enforcement of safety regulations, targeting high-risk carriers and commercial motor vehicle drivers; improving safety information systems

and commercial motor vehicle technologies; strengthening commercial motor vehicle equipment and operating standards; and increasing safety awareness. To accomplish these activities, the Administration works with Federal, State, and local enforcement agencies, the motor carrier industry, labor safety interest groups, and others.

Activities

Commercial Drivers' Licenses The Administration develops standards to test and license commercial motor vehicle drivers.

Data and Analysis The Administration collects and disseminates data on motor carrier safety and directs resources to improve motor carrier safety.

Regulatory Compliance and Enforcement The Administration operates a program to improve safety performance and remove high-risk carriers from the Nation's highways.

Research and Technology The Administration coordinates research and

development to improve the safety of motor carrier operations and commercial motor vehicles and drivers.

Safety Assistance The Administration provides States with financial assistance for roadside inspections and other commercial motor vehicle safety programs. It promotes motor vehicle and motor carrier safety.

Other Activities The Administration supports the development of unified motor carrier safety requirements and procedures throughout North America. It participates in international technical organizations and committees to help share the best practices in motor carrier safety throughout North America and the rest of the world. It enforces regulations ensuring safe highway transportation of hazardous materials and has established a task force to identify and investigate those carriers of household goods which have exhibited a substantial pattern of consumer abuse.

Surface Transportation Board

The Surface Transportation Board was established in 1996 by the Interstate Commerce Commission (ICC) Termination Act of 1995 (49 U.S.C. 10101 *et seq.*) as an independent adjudicatory body organizationally housed within the Department of Transportation with jurisdiction over certain surface transportation economic regulatory matters formerly under ICC jurisdiction. The Board consists of three

members, appointed by the President with the advice and consent of the Senate for 5-year terms.

The Board adjudicates disputes and regulates interstate surface transportation through various laws pertaining to the different modes of surface transportation. The Board's general responsibilities include the oversight of firms engaged in transportation in interstate and foreign commerce to the extent that it takes

place within the United States, or between or among points in the contiguous United States and points in Alaska, Hawaii, or U.S. territories or possessions. Surface transportation matters under the Board's jurisdiction in general include railroad rate and service issues, rail restructuring transactions (mergers, line sales, line construction, and line abandonments), and labor matters related thereto; certain trucking company, moving van, and noncontiguous ocean shipping company rate matters; certain intercity passenger bus company structure, financial, and operational matters; and certain pipeline matters not regulated by the Federal Energy Regulatory Commission.

In performing its functions, the Board is charged with promoting, where appropriate, substantive and procedural regulatory reform and providing an

efficient and effective forum for the resolution of disputes. Through the granting of exemptions from regulations where warranted, the streamlining of its decisionmaking process and the regulations applicable thereto, and the consistent and fair application of legal and equitable principles, the Board seeks to provide an effective forum for efficient dispute resolution and facilitation of appropriate market-based business transactions. Through rulemakings and case disposition, it strives to develop new and better ways to analyze unique and complex problems, to reach fully justified decisions more quickly, to reduce the costs associated with regulatory oversight, and to encourage private sector negotiations and resolutions to problems, where appropriate.

For further information, contact the Office of Congressional and Public Services, Surface Transportation Board, 395 E Street, SW., Washington, DC, 20423-0001. Phone, 202-245-0230. Internet, www.stb.dot.gov.

Sources of Information

Inquiries for information on the following subjects should be directed to the specified office, Department of Transportation, Washington, DC 20590, or to the address indicated.

Civil Rights For information on equal employment opportunity, nondiscrimination in DOT employment and transportation services, or DOT's Disadvantaged Business Enterprise certification appeals program, contact the Director, Departmental Office of Civil Rights. Phone, 202-366-4648. Internet, www.dot.gov/ost/docr.
