RIN 1018-AD68

Subsistence Management Regulations for Public Lands in Alaska, Subparts A, B, C, and D, Redefinition to Include Waters Subject to Subsistence Priority; Correction

AGENCY: Forest Service, Agriculture; and Fish and Wildlife Service, Interior. **ACTION:** Final rule; correction.

SUMMARY: This document corrects
Sections 50 CFR 100.24 and 36 CFR
242.24 of the Subsistence Management
Regulations for Public Lands in Alaska,
Subparts A, B, C, and D, Redefinition to
Include Waters Subject to Subsistence
Priority that was published in the
Federal Register of January 8, 1999, to
include updated material which was
inadvertently omitted. This document
also corrects the effective dates for 36
CFR 242.26 and 242.27 and 50 CFR
100.26 and 100.27.

DATES: This correction to 36 CFR 242.24 and 50 CFR 100.24 is effective October 1, 1999. The effective dates for 36 CFR 242.26 and 242.27 and 50 CFR 100.26 and 100.27 are corrected to be October 1, 1999 through February 28, 2001.

FOR FURTHER INFORMATION CONTACT:

Chair, Federal Subsistence Board, c/o U.S. Fish and Wildlife Service, Thomas H. Boyd, (907) 786–3888. For questions specific to National Forest System lands, contact Ken Thompson, Regional Subsistence Program Manager, USDA, Forest Service, Alaska Region, (907) 271–2540.

SUPPLEMENTARY INFORMATION: On January 8, 1999, the Secretaries of the Interior and Agriculture published a Final Rule in the **Federal Register** (64 FR 1276) that extended jurisdiction for providing subsistence priority to rural Alaskans for harvesting fish in waters

where there is a Federal reservedwater right. In that document, an outdated version of Section ______.24(a)(1) was inadvertently used. The Federal Subsistence Board, which has been delegated authority to promulgate regulations in subparts C and D, has also corrected the wording of Section _____.24(a) introductory text. This document corrects Sections _____.24(a) introductory text and

Because this rule relates to public lands managed by an agency or agencies in both the Departments of Agriculture and the Interior, identical text is incorporated into 36 CFR Part 242 and 50 CFR Part 100.

Conformance with Statutory and Regulatory Authorities

.24(a)(1).

National Environmental Policy Act Compliance

A Draft Environmental Impact Statement (DEIS) that described four alternatives for developing a Federal Subsistence Management Program was distributed for public comment on October 7, 1991. That document described the major issues associated with Federal subsistence management as identified through public meetings, written comments and staff analysis and examined the environmental consequences of the four alternatives. Proposed regulations (Subparts A, B, and C) that would implement the preferred alternative were included in the DEIS as an appendix. The DEIS and the proposed administrative regulations presented a framework for an annual regulatory cycle regarding subsistence hunting and fishing regulations (Subpart D). The Final Environmental Impact Statement (FEIS) was published on February 28, 1992.

Based on the public comment received, the analysis contained in the FEIS, and the recommendations of the Federal Subsistence Board and the Department of the Interior's Subsistence Policy Group, it was the decision of the Secretary of the Interior, with the concurrence of the Secretary of Agriculture, through the U.S. Department of Agriculture-Forest Service, to implement Alternative IV as identified in the DEIS and FEIS (Record of Decision on Subsistence Management for Federal Public Lands in Alaska (ROD), signed April 6, 1992). The DEIS and the selected alternative in the FEIS defined the administrative framework of an annual regulatory cycle for subsistence hunting and fishing regulations. The final rule for Subsistence Management Regulations for Public Lands in Alaska, Subparts A,

B, and C (57 FR 22940–22964, published May 29, 1992) implemented the Federal Subsistence Management Program and included a framework for an annual cycle for subsistence hunting and fishing regulations.

An environmental assessment has been prepared on the expansion of Federal jurisdiction over fisheries and is available by contacting the office listed under "For Further Information Contact." The Secretary of the Interior with the concurrence of the Secretary of Agriculture has determined that the expansion of Federal jurisdiction does not constitute a major Federal action, significantly effecting the human environment and has, therefore, signed a Finding of No Significant Impact.

Compliance with Section 810 of ANILCA

A Section 810 analysis was completed as part of the FEIS process on the Federal Subsistence Management Program. The intent of all Federal subsistence regulations is to accord subsistence uses of fish and wildlife on public lands a priority over the taking of fish and wildlife on such lands for other purposes, unless restriction is necessary to conserve healthy fish and wildlife populations. The final Section 810 analysis determination appeared in the April 6, 1992, ROD which concluded that the Federal Subsistence Management Program, under Alternative IV with an annual process for setting hunting and fishing regulations, may have some local impacts on subsistence uses, but it does not appear that the program may significantly restrict subsistence uses.

During the environmental assessment process, an evaluation of the effects of this rule was also conducted in accordance with Section 810. This evaluation supports the Secretaries' determination that the Final Rule will not reach the "may significantly restrict" threshold for notice and hearings under ANILCA Section 810(a) for any subsistence resources or uses.

Paperwork Reduction Act

This rule contains information collection requirements subject to Office of Management and Budget (OMB) approval under the Paperwork Reduction Act of 1995. It applies to the use of public lands in Alaska. The information collection requirements are a revision of the collection requirements already approved by OMB under 44 U.S.C. 3501 and have been assigned clearance number 1018–0075, which expires 5/31/2000. This revision was submitted to OMB for approval. A comment period was open on OMB

collection requirements and no comments were received.

Currently, information is being collected by the use of a Federal Subsistence Registration Permit and Designated Hunter Application. The information collected on these two permits establishes whether an applicant qualifies to participate in a Federal subsistence hunt on public land in Alaska and provides a report of harvest and the location of harvest. The collected information is necessary to determine harvest success, harvest location, and population health in order to make management decisions relative to the conservation of healthy wildlife populations. Additional harvest information is obtained from harvest reports submitted to the State of Alaska. The recordkeeping burden for this aspect of the program is negligible (one hour or less). This information is accessed via computer data base. The current overall annual burden of reporting and recordkeeping is estimated to average 0.25 hours per response, including time for reviewing instructions, gathering and maintaining data, and completing and reviewing the form. The estimated number of likely respondents under the existing rule is less than 5,000, yielding a total annual reporting and recordkeeping burden of 1,250 hours or less.

The collection of information under this Final Rule will be achieved through the use of a Federal Subsistence Registration Permit Application, which would be the same form as currently approved and used for the hunting program. This information will establish whether the applicant qualifies to participate in a Federal subsistence fishery on public land in Alaska and will provide a report of harvest and location of harvest.

The likely respondents to this collection of information are rural Alaska residents who wish to participate in specific subsistence fisheries on Federal land. The collected information is necessary to determine harvest success and harvest location in order to make management decisions relative to the conservation of healthy fish populations. The annual burden of reporting and recordkeeping is estimated to average 0.50 hours per response, including time for reviewing instructions, gathering and maintaining data, and completing and reviewing the form. The estimated number of likely respondents under this rule is less than 10,000, yielding a total annual reporting and recordkeeping burden of 5,000

Direct comments on the burden estimate or any other aspect of this form

hours or less.

to: Information Collection Officer, U.S. Fish and Wildlife Service, 1849 C Street, NW, MS 224 ARLSQ, Washington, D.C. 20240; and the Office of Management and Budget, Paperwork Reduction Project (Subsistence), Washington, D.C. 20503. Additional information collection requirements may be imposed if Local Advisory Committees subject to the Federal Advisory Committee Act are established under Subpart B.

Additional information collection requirements may be imposed if local advisory committees subject to the Federal Advisory Committee Act are established under subpart B. Such requirements will be submitted to OMB for approval prior to their implementation.

Clarity of the Rule

Executive Order 12866 requires each agency to write regulations that are easy to understand. We invite your comments on how to make this rule easier to understand, including answers to questions such as the following: (1) Are the requirements in the rule clearly stated? (2) Does the rule contain technical language or jargon that interferes with its clarity? (3) Does the format of the rule (grouping and order of sections, use of headings, paragraphing, etc.) aid or reduce its clarity? (4) Would the rule be easier to understand if it were divided into more (but shorter) sections? (A "section" appears in bold type and is preceded by the symbol "§" and a numbered heading; for example, § Customary and traditional determinations.) (5) Is the description of the rule in the "Supplementary Information" section of the preamble helpful in understanding the rule? What else could we do to make the rule easier to understand? Send a copy of any comments that concern how we could make this rule easier to understand to: USFWS, Office of Subsistence Management, Thomas H. Boyd, 1011 E. Tudor Road, Anchorage, Alaska 99503.

Other Requirements

This rule was not subject to OMB review under Executive Order 12866.

This rulemaking will impose no significant costs on small entities; this Final Rule does not restrict any existing sport or commercial fishery on the public lands and subsistence fisheries will continue at essentially the same levels as they presently occur. The exact number of businesses and the amount of trade that will result from this Federal land-related activity is unknown. The aggregate effect is an insignificant positive economic effect on a number of small entities, such as ammunition,

snowmachine, fishing tackle, and gasoline dealers. The number of small entities affected is unknown; but, the fact that the positive effects will be seasonal in nature and will, in most cases, merely continue preexisting uses of public lands indicates that they will not be significant.

In general, the resources to be harvested under this rule are already being harvested and consumed by the local harvester and do not result in an additional dollar benefit to the economy. However, it is estimated that 24 million pounds of fish (including 8.3 million pounds of salmon) are harvested by subsistence users annually and, if given an estimated dollar value of \$3.00 per pound for salmon and \$0.58 per pound for other fish, would equate to about \$34 million in food value statewide.

The Regulatory Flexibility Act of 1980 (5 U.S.C. 601 et seq.) requires preparation of flexibility analyses for rules that will have a significant effect on a substantial number of small entities, which include small businesses, organizations or governmental jurisdictions. The Departments have determined based on the above figures that this rulemaking will not have a significant economic effect on a substantial number of small entities within the meaning of the Regulatory Flexibility Act.

The Small Business Regulatory Enforcement Act (5 U.S.C. 801 et seq.) requires that before a rule can take effect, copies of the rule and other documents must be sent to the U.S. House and U.S. Senate and establishes a means for Congress to disapprove the rulemaking. The Departments have determined that this rulemaking is not a major rule under the Act, and thus the effective date of the rule is not additionally delayed unless Congress takes additional action.

Title VIII of ANILCA requires the Secretaries to administer a subsistence priority on public lands. The scope of this program is limited by definition to certain public lands. Likewise, these regulations have no potential takings of private property implications as defined by Executive Order 12630.

The Secretaries have determined and certify pursuant to the Unfunded Mandates Act, 2 U.S.C. 1502 et seq., that this rulemaking will not impose a cost of \$100 million or more in any given year on local or state governments or private entities. The implementation of this rule is by Federal agencies and there is no cost imposed on any state or local entities or tribal governments.

The Secretaries have determined that these final regulations meet the

applicable standards provided in Sections 3(a) and 3(b)(2) of Executive Order 12988.

In accordance with Executive Order 12612, the rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment. Title VIII of ANILCA precludes the State from exercising subsistence management authority over fish and wildlife resources on Federal lands unless it meets certain requirements.

In accordance with the President's memorandum of April 29, 1994, "Government-to-Government Relations with Native American Tribal Governments" (59 FR 22951) and 512 DM 2, we have evaluated possible effects on Federally recognized Indian tribes and have determined that there are no effects. The Bureau of Indian Affairs is a participating agency in this rulemaking.

Drafting information—William Knauer drafted this correction under the guidance of Thomas H. Boyd, of the Office of Subsistence Management, Alaska Regional Office, U.S. Fish and Wildlife Service, Anchorage, Alaska. Peggy Fox, Alaska State Office, Bureau of Land Management; Sandy

Rabinowitch, Alaska Regional Office, National Park Service; Ida Hildebrand, Alaska Area Office, Bureau of Indian Affairs; and Ken Thompson, USDA-Forest Service provided additional guidance.

List of Subjects

36 CFR Part 242

Administrative practice and procedure, Alaska, Fish, National forests, Public lands, Reporting and recordkeeping requirements, Wildlife.

50 CFR Part 100

Administrative practice and procedure, Alaska, Fish, National forests, Public lands, Reporting and recordkeeping requirements, Wildlife.

For the reasons set out in the preamble, the Departments correct FR Doc. 99–11 published at 64 FR 1276, January 8, 1999, as set forth below:

PART—SUBSISTENCE MANAGEMENT REGULATIONS FOR PUBLIC LANDS IN ALASKA [CORRECTED]

1. On page 1294, beginning in column 2, correct paragraphs (a) introductory

text and (a)(1) of 36 CFR 242.24 and 50 CFR 100.24, to read as follows:

§ _____.24 Customary and traditional use determinations.

(a) The Federal Subsistence Board has determined that rural Alaska residents of the listed communities, areas, and individuals have customary and traditional use of the specified species on Federal public land in the specified areas. Persons granted individual customary and traditional use determinations will be notified in writing by the Board. The Fish and Wildlife Service and the local NPS Superintendent will maintain the list of individuals having customary and traditional use on National Parks and Monuments. A copy of the list is available upon request. When there is a determination for specific communities or areas of residence in a Unit, all other communities not listed for that species in that Unit have no Federal subsistence for that species in that Unit. If no determination has been made for a species in a Unit, all rural Alaska residents are eligible to harvest fish or wildlife under this part.

(1) Wildlife determinations.

Area	Species	Determination
	Opecies	Determination
Unit 1(C)	Black Bear	Residents of Unit 1(C), 1(D), 3, and residents of Hoonah, Pelican, Point Baker, Sitka, and Tenakee Springs.
1(A)	Brown Bear	Residents of Unit 1(A) except no subsistence for residents of Hyder.
1(B)	Brown Bear	Residents of Unit 1(A), Petersburg, and Wrangell, except no subsistence for residents of Hyder.
1(C)	Brown Bear	Residents of Unit 1(C), Haines, Hoonah, Kake, Klukwan, Skagway, and Wrangell, except no subsistence for residents of Gustavus.
1(D)	Brown Bear	Residents of 1(D).
