

subscribers for receipt of broadcast signals. A cable system's individual gross receipts determine the applicable percentages. These percentages, and the gross receipts limitations, are published in 37 CFR part 256 and are subject to adjustment at five-year intervals. 17 U.S.C. 801(b)(2)(A) & (D). This was a window year for such an adjustment.

The Library received two petitions for a rate adjustment and published a **Federal Register** notice seeking comment on these petitions and directed interested parties to file a Notice of Intent to Participate in a Copyright Arbitration Royalty Panel ("CARP") proceeding. 65 FR 10564 (February 28, 2000). The Library also designated a 30-day period to negotiate a settlement as to adjustment of the rates. 37 CFR 251.63(a). The Library extended the negotiation period on two separate occasions in Orders dated May 15, 2000, and June 5, 2000. The extensions proved to be successful, as the Library received a joint proposal to adjust the cable royalty fees and the gross receipts limitations.

Pursuant to § 251.63(b) of the CARP rules, the Library published in the **Federal Register** the proposed adjustments to the percentages of gross receipts paid by cable systems, and the gross receipts limitations. 65 FR 54984 (September 12, 2000). Section 251.63(b) provides that the Library "may adopt the rate embodied in the proposed settlement without convening an arbitration panel, provided that no opposing comment is received by the Librarian [of Congress] from a party with an intent to participate in a CARP proceeding." 37 CFR 251.63(b). No comments or Notices of Intent to Participate were received, enabling publication of today's final regulations adopting the proposed settlement.

The regulations take effect on July 1, 2000, which means that the new cable rates, and the gross receipts limitations, are applicable to the second accounting period of 2000 and thereafter.

**ACTION:** Notice of deletion of the White Farm Equipment Landfill Superfund site (site) from the National Priorities List (NPL).

**SUMMARY:** The EPA Region VII announces the deletion of the White Farm Equipment Landfill site, Charles City, Iowa from the NPL. The NPL is appendix B of 40 CFR part 300 which is the National Oil and Hazardous Substances Pollution Contingency Plan (NCP), which EPA promulgated pursuant to section 105 of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA), as amended. The EPA and the state of Iowa have determined that the site poses no significant threat to public health or the environment and, therefore, no further remedial measures pursuant to CERCLA are appropriate.

**EFFECTIVE DATE:** October 30, 2000.

**FOR FURTHER INFORMATION CONTACT:** Catherine Barrett, Remedial Project Manager, U.S. EPA, Region VII, Superfund Division, 901 North 5th Street, Kansas City, Kansas 66101, telephone (913) 551-7704, fax (913) 551-7063.

**SUPPLEMENTARY INFORMATION:** The site to be deleted from the NPL is: White Farm Equipment Landfill site, Charles City, Iowa.

A Notice of Intent to Delete for this site was published in the **Federal Register** on September 7, 2000 (65 FR 54190). The closing date for comments on the Notice of Intent to Delete was October 10, 2000. No comments were received, therefore, EPA has not prepared a Responsiveness Summary. The EPA identifies sites that appear to present a significant risk to public health, welfare, or the environment and it maintains the NPL as the list of those sites. Any site deleted from the NPL remains eligible for fund-finances remedial actions in the unlikely event that conditions at the site warrant such action. Section 300.425(e)(3) of the NCP states that fund-financed actions may be taken at sites deleted from the NPL. Deletion of a site from the NPL does not affect responsible party liability or

impede agency efforts to recover costs associated with response efforts.

#### SUPPLEMENTARY INFORMATION:

##### I. Regulatory Background

On September 26, 1994, NHTSA published a final rule establishing Standard No. 304, *Compressed Natural Gas Fuel Container Integrity*, which specifies tests and performance requirements regarding the durability, strength, and pressure relief of compressed natural gas (CNG) fuel containers. (59 FR 49010) The September 1994 final rule also specified labeling requirements for CNG fuel containers. The CNG fuel container requirements are based on specifications in ANSI/NGV2, a voluntary industry standard addressing CNG fuel containers which was adopted by the American National Standards Institute (ANSI).<sup>1</sup> One of the performance tests involves subjecting containers to a bonfire test to evaluate their pressure relief characteristics.

NHTSA decided in the September 1994 final rule to specify that No. 2 diesel fuel be used to generate the fire in the bonfire test. The agency indicated that it was specifying No. 2 diesel fuel on an interim basis because of its awareness that environmental problems result from use of this fuel. The agency stated that it would study whether other fuels could be used for the bonfire test.

<sup>1</sup> NGV2 was developed by an industry working group that included container manufacturers, CNG users, and utilities.
