## DEPARTMENT OF TRANSPORTATION

### Federal Aviation Administration

#### 14 CFR Part 23

[Docket No. CE206; Special Conditions No. 23-146-SC]

#### **Special Conditions: Cessna Aircraft Company; Cessna Model 182T/T182T Airplane; Installation of Electronic Flight Instrument System and the Protection of the System From High Intensity Radiated Fields (HIRF)**

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Final special conditions; request for comments.

**SUMMARY:** These special conditions are issued for the Cessna Aircraft Company, Model 182T/T182T airplane. This airplane, as modified by Cessna Aircraft Company, will have a novel or unusual design feature(s) associated with the installation of a Garmin G1000 electronic flight instrument system and the protection of this system from the effects of high intensity radiated field (HIRF) environments. The applicable airworthiness regulations do not contain adequate or appropriate safety standards for this design feature. These special conditions contain the additional safety standards that the Administrator considers necessary to establish a level

of safety equivalent to that established by the existing airworthiness standards.

**DATES:** The effective date of these special conditions is April 27, 2004. Comments must be received on or before June 10, 2004.

**ADDRESSES:** Comments on these special conditions may be mailed in duplicate to: Federal Aviation Administration, Regional Counsel, ACE-7, Attention: Rules Docket CE206, 901 Locust, Room 506, Kansas City, Missouri 64106; or delivered in duplicate to the Regional Counsel at the above address. Comments must be marked: CE206. Comments may be inspected in the Rules Docket weekdays, except Federal holidays, between 7:30 a.m. and 4 p.m.

**FOR FURTHER INFORMATION CONTACT:** Mr. Wes Ryan, Federal Aviation Administration, Aircraft Certification Service, Small Airplane Directorate, ACE-111, 901 Locust, Room 301, Kansas City, Missouri, 816-329-4127, fax 816-329-4090.

**SUPPLEMENTARY INFORMATION:** The FAA has determined that notice and opportunity for prior public comment hereon are impracticable because these procedures would significantly delay issuance of the approval design and thus delivery of the affected aircraft. In addition, the substance of these special conditions has been subject to the public comment process in several prior instances with no substantive comments received. The FAA therefore finds that good cause exists for making these special conditions effective upon issuance.

#### **Comments Invited**

Interested persons are invited to submit such written data, views, or arguments as they may desire. Communications should identify the

regulatory docket or special condition number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments will be considered by the Administrator. The special conditions may be changed in light of the comments received. All comments received will be available in the Rules Docket for examination by interested persons, both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerning this rulemaking will be filed in the docket. Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must include a self-addressed, stamped postcard on which the following statement is made: "Comments to CE206." The postcard will be date stamped and returned to the commenter.

#### **Background**

On April 7, 2003, Cessna Aircraft Company applied for an amended type certificate for their new Cessna Model 182T to install a Garmin G1000 electronic flight instrument system with a primary flight display on the pilot side and a multifunction display in the center instrument panel. The Cessna Model 182T is single engine, high wing airplane capable of carrying four passengers.

The proposed modification incorporates a novel or unusual design feature, such as digital avionics consisting of an EFIS that may be vulnerable to HIRF external to the airplane.

#### **Type Certification Basis**

Under the provisions of 14 CFR 21.101, Cessna Aircraft Company must
